

Order Management – Billing – Issue Tracking

Business Performance Dashboard – Account/Subscriber Management

**Control your business...
Order through cash!**

Sajus Technologies is a provider of customizable order-through-cash solutions for mid-sized and larger organizations. We use our proven SajusAssureTM line of products to streamline the process of receiving orders, provisioning products and services, billing customers, monitoring performance, and tracking issues.

Sajus provides “Software as a Service” solutions so there is no need to install and maintain expensive software on your premises. Sajus can manage your solution entirely or train your staff to handle maintenance. Sajus solutions can be purchased as monthly subscriptions or standalone installations.

Who Benefits From Sajus Solutions?

- Do you have complicated billing needs like tiered/stepped pricing, metered transactions from multiple systems, complex contracts, different pricing for different customers and/or marketing promotions?
 - Are you reselling services from multiple vendors and having difficulty reconciling with customer bills?
 - Is your existing system expensive to maintain?
 - Does your billing system limit you from launching new products & services?
 - Do you have unique order processing or billing requirements that your current system doesn't handle?
 - Are there costly manual inefficiencies in your order management/billing processes?
 - Are you concerned that your process is in compliance with regulations, service level agreements, and corporate objectives?
 - Are customer and internal complaints effectively and efficiently tracked, open through close?
 - Are all critical performance indicators being automatically monitored?
 - Are error-prone, manually created spreadsheets being used to keep track of important metrics?
-

If you answered yes to any of these questions, you can benefit from a Sajus solution.

Order Management

Benefits

- Sell what you want to sell – supports complicated products, services, and subscription-based orders
- Reduce call centre and administrative costs through customer self care portal
- Increase competitive advantage through ease of adding new & unique product/service offerings

Who's Using Sajus?

Companies such as:

- Rogers
- Yak Communications
- Stryker

Want to increase revenue, decrease costs, be more competitive and improve customer satisfaction?

The order management process should allow customer service reps to focus on relationships and selling, not paperwork or cumbersome systems.

Sajus believes that a company and its customers are best served by effectively taking and tracking an order through its lifecycle. That means that when a customer places an order and has a certain expectation, that expectation is fulfilled. Furthermore, the company expects timely payment, and certainly that expectation must be fulfilled as well.

SajusAssure™ Order Management Features

- Captures orders via customer service reps or via customers themselves online.
- Eliminates paper forms
- Automates and simplifies complicated order management workflow
- Ensures order accuracy
- Real-time order status
- Data stored for sales forecasting and cross-selling promotions

Want to increase revenue, decrease costs, be more competitive and improve customer satisfaction?

The keys to better business process management, are automation and monitoring. Automation is a great way to reduce costs, improve efficiency, and increase speed. However, when exceptions occur they can be highly detrimental if not caught and addressed. Sajus software allows routine tasks to be automated and gives people the tools to manage exceptions.

SajusAssure™ Remediation Features

- Tracks and manages process exceptions, customer inquiries, employee issues, or other process related problems.
- Support for distributed teams
- Web-based system
- Simple and easy-to-use
- Tight security
- Full audit trails
- Management reports

The screenshot displays the SajusAssure web application interface. At the top, there is a navigation bar with links for Administrator, Issue, Issue Audit Trail, and Contact. Below this is a search and filter section with options for Title, Priority, Creator, Problem Area, Type, and Organization. A search value field, a sort by dropdown (set to Title), and a page limit field (set to 5) are also visible. The main content area is titled "Issue List" and contains a table with the following data:

Issue ID	Short Description	Priority	Creator	Type	Problem Area	Organization	Moderator	Comment
SPRINT_002	Month over Month report	1	Andriy	Bug Fix	BPM Console	sprint	admin	Month over Month Analysis (Revenue / Cost) No matter which months, or how many the first and last months have the same numbers.
SAJUS_0023	Table rate Maintenance form	1	admin	Bug Fix	BPM Console	sajus	peter000	Table rate Maintenance. I am not able to make changes. I.e. Table does not appear

At the bottom of the table, there is a pagination control showing page 26 of 27.
